EXPERIENCE

# CV. DB KLIK

**Data Analyst**
Surabaya, East Java · Jan 2025 – Oct 2026

- Led a team of 11 data analyst interns as Person in Charge (PIC), coordinating analytical tasks, mentoring members and keeping deliverables aligned with company objectives.
- Engineered a daily Shopee and Tokopedia scraper tracking 50+ competitors (~100K data points per day) across product price, stock and monthly sales.
- Uncovered IDR 31.9 bn in recoverable cash through a Cash Conversion Cycle (CCC) analysis of inventory and receivables.
- Built an inventory forecasting system for 6 branches that automates min/max stock levels and purchase order recommendations, exposing IDR 16.8 bn of excess inventory and 708 SKUs with unmet demand.
- Analyzed 144,000+ transactions across ~2,500 products and deployed a Power BI dashboard tracking 10+ KPIs, enabling 15% faster identification of top products.
- Delivered 50+ Excel analyses using INDEX-MATCH, XLOOKUP, SUMIFS, nested IF and PivotTables.

FEATURED · MACHINE LEARNING

# STOCK OPTIMIZATION SYSTEM

*An end-to-end stock analysis app that turns sales history into min/max stock levels and purchase orders for every branch.*

- Integrates historical sales data, product reference data and current stock levels to generate stock recommendations — minimum stock, maximum stock, stock status and suggested purchase orders (PO) per branch.
- Deployed as an interactive Streamlit web app so operational teams can run the analysis on their own, without manual calculations.

WHAT IT DOES

- Minimum and maximum stock per branch
- Stock status and suggested purchase orders
- Weighted Moving Average (WMA) demand forecasting
- ABC Analysis for prioritisation
