Data Science undergraduate at Universitas Pembangunan Nasional Veteran Jawa Timur with hands-on experience in data analysis, business intelligence, and prediction. Skilled in Python, SQL, and data visualization tools (Power BI, Tableau, Looker Studio) to transform complex data into actionable business insights. Experienced in building forecasting models, interactive dashboards, and analytical systems to support operational and strategic decision-making. Passionate about leveraging data-driven approaches to solve real-world business problems and continuously improving analytical and technical capabilities.

WORK EXPERIENCE

CV. DB Klik – Surabaya, East Java — Jan 2025 – Oct 2026

Data Analyst

- Led a team of 11 data analyst interns as Person in Charge (PIC), coordinating analytical tasks, mentoring team members, and ensuring project deliverables aligned with company objectives.
- Engineered a daily Shopee and Tokopedia scraper tracking 50+ competitors (~100K data points per day) covering product price, stock, and monthly sales. to support pricing decisions.
- Uncovered IDR 31.9 bn in recoverable cash through a Cash Conversion Cycle (CCC) analysis of inventory and receivables.
- Designed and deployed a real-time sales performance dashboard using Power BI tracking 10+ Key Performance Indicators (KPIs), enabling 15% faster identification of high-performing products.
- Built an inventory analysis forecasting system for 6 branches that automating min/max stock levels and purchase order recommendations, exposing IDR 16.8 bn of excess inventory and 708 SKUs with unmet demand.
- Analyzed 144,000+ transactions across ~2,500 products to guide listing, pricing, and campaign decisions; built a Power BI dashboard tracking 10+ KPIs, enabling 15% faster identification of top products.
- Delivered 50+ Excel analyses built on advanced formulas (INDEX-MATCH, XLOOKUP, SUMIFS, nested IF) and PivotTables, turning raw sales and product data into insights for the sales and product teams.

Little Totler – Singapore (Work From Home) — Aug 2025 – Feb 2026

Marketplace Operation

- Managed end-to-end operations for 3 major marketplaces (Shopee, Shopify, Lazada, Tokopedia Tiktok), driving a 30% growth in Gross Merchandise Volume (GMV) within 6 months through strategic campaigns and product optimization.
- Managed all aspects of the Instagram and tiktok channel, creating and scheduling 30+ content pieces (posts, Reels, Stories) monthly.
- Created monthly sales and performance summary reports, analyzing marketplace metrics, campaign results, and product performance to support data-driven business decisions.

Boughtnex – Singapore (Work From Home) — June 2025 – Aug 2025

Marketplace Operation

- Oversaw end-to-end operations for 6 distinct stores on 3 key platforms (Shopee, Lazada, Tokopedia Tiktok)
- Spearheaded major sales campaigns (e.g., 9.9, 11.11, Payday Sales) and Analyzed competitor marketing tactics and ad spending, enabling the development of counter-campaigns.

Telkomsel Branch Surabaya – Surabaya, East Java — Sept 2024 – Dec 2024

Data Analyst

- Processed and analyzed 1M+ rows of customer data, identifying that the top 10% of users contributed to 40% of total revenue, which informed the creation of a new loyalty program.
- Developed 10+ interactive dashboards using Looker Data Studio, providing real-time visualizations for sales, events, and customer feedback to support strategic decision-making.
- Provided data-driven recommendations that enhanced sales strategies and supported business growth initiatives.

EDUCATIONS

Universitas Pembangunan Nasional Veteran Jawa Timur – Surabaya, East Java — Aug 2022 – Present

Undergraduate in Data Science

- Coursework: Exploratory Data Analysis, Data Mining, Machine Learning, Big Data, Cloud Computing, Advanced Programming Algorithms, Artificial Intelligence, Data Wrangling, and Multivariate Statistics, aligned with the Data Science curriculum covering core computational analytics and predictive modeling using Python and Scikit-Learn.

ORGANIZATIONAL EXPERIENCE

Unit Kegiatan Kerohanian Islam (UKKI) | UPN "Veteran" Jawa Timur
Islamic student organization

General Secretary Jan 2024 – Dec 2025

- Led and coordinated 6 department secretaries, keeping administration consistent and on schedule across an organization of ±80 active members.
- Oversaw organization-wide correspondence, meeting minutes, document archives, and the annual work program schedule, ensuring ±40 programs and ±60 official letters were properly managed, numbered, and tracked annually.
- Recorded, distributed, and followed up on minutes for ±20 board and organization meetings until completion.
- Maintained a structured digital archive of organizational documents (proposals, accountability reports, and member data) for easy retrieval and handover.

- Administered documents for ±5 department programs, including activity proposals, attendance lists, and event reports.
- Scheduled department activities and managed correspondence with members and external parties.
- Managed the department's Instagram account (@difaaul_balad), creating and publishing content to promote its programs.

ANOTHER PROJECTS

MACHINE LEARNING

- **Deforestation Analysis in Indonesian Provinces –** Investigated relationships between land use activities and deforestation using K-Means clustering and OLS regression with Python.
- **Ethereum Price Forecasting –** Built a time series forecasting model using Facebook Prophet to predict Ethereum price trends from historical data.
- **Flood Relief Distribution Route Optimization –** Implemented Dijkstra's algorithm to determine the most efficient routes for distributing flood relief aid in Cerme, Gresik using Python and GIS.
- **Smart Room Temperature Control System:** Designed an automated temperature control system with Fuzzy Logic to adjust fan or AC levels based on changing environmental conditions, improving comfort and energy efficiency through intelligent decision-making

DASHBOARD

- **Olist E-Commerce Performance Dashboard –** Analyzed sales trends, customer distribution, product performance, and review metrics and visualized insights through an interactive Power BI dashboard.
- **Airbnb Marketplace Analytics Dashboard –** Explored pricing patterns, geographic distribution, and host behavior using Airbnb dataset and visualized insights with Looker Data Studio.
- **HR Analytics Dashboard –** Developed a dashboard to analyze employee attrition, workforce distribution, and turnover factors to support HR decision-making using Tableau.
- **Coffee Shop Sales Analytics Dashboard –** Created a sales monitoring dashboard to track daily revenue, order volume, product demand, and peak sales patterns using Power BI.
- **Business Portfolio & Financial Performance Dashboard –** Developed a financial analytics dashboard to monitor portfolio performance, financial metrics, and receivable risks across multiple business units using Power BI.

SKILLS

Technical	**:** Python, MySQL, SPSS, Excel
Data Visualization	**:** Power BI, Tableau, Looker Studio
Analytics	**:** Time Series Forecasting, Machine Learning, Inventory Analytics (WMA, ABC), Regression, Clustering
Other Tools	**:** Microsoft Word & PowerPoint, Canva, CapCut, Photography, Social Media Content
Soft Skills	**:** Public Speaking, Teamwork, Leadership, Critical Thinking, Problem Solving, Time Management
Languages	**:** Indonesian (Native), English (Passive)
